

World Without Waste

The project results

70 schools participated in the project

The stakeholder schools have been selected by Yerevan Municipality.

350 sorting bins have been installed

Sorting bins for plastic and paper waste have been installed in all the selected schools.

One workbook has been developed

The workbook has been provided to all the participants of the trainings and/or the school libraries

3,465 students have participated in environmental trainings

During the trainings the participants learned about the environmental problems that Armenia and the world are facing, as well as their possible solutions.

Training of trainers has been organized for the teachers of the selected 70 schools

During the training, the teachers gained extensive knowledge on how to conduct environmental trainings with students.
